TRACE ELEMENT Supplements

Selovin LA
Long Acting Injectable Selenium
Selenium is necessary for growth and fertility. If deficient in Selenium, cattle and sheep can suffer from poor growth rates, reduced production, lower fertility and poor immunity.

SmartShot B12 plus Se
Restores deficiencies with the convenience of just one injection over a 6 month treatment period.

VET LSD Veterinary Livestock Survival Drench
Vitamin A
Vitamin C
Vitamin D
Vitamin E
Iodine
Chromium
Selenium

COPPER Supplements

Copper levels drop through the winter as stock eat more soil contaminated pasture. Brassica crops are also very low in copper. The ingested soil has iron, sulphur and molybdenum, which tie up copper. A copper treatment to young stock can give dramatic growth rate responses.

INJECTION

- Provides long term effective copper supplementation
- Copa Caps are available in 4 convenient capsule sizes
- PRESCRIPTION MEDICINE Supplied only with vet consultation

VET CENTRE INITIATIVE

UTILISE REFUGIA

Utilising refugia involves not treating selected animals on a property to ensure a balance of susceptible larvae are present on the property. Purchase some "refugia" tags to clearly identify undrenched animals for monitoring.
